Course Description:  
Do you start your day with coffee? Coffee is an integral part of life for producers and consumers around the world, and it is the world’s second most valuable commodity produced by developing countries (in terms of total trade dollars). This course will consider the diverse expressions and ramifications of “coffee culture,” from the farmers who see it as their life, to the buyers and traders who know it as a living, to the drinkers who can’t imagine life without cups of java. We will explore the historical roots of coffee production and trade, including its roles in nation-building and international power relations, and its current implications for environmental change, economic development and social justice. Alternatives to conventional coffee production and marketing will be considered, such as Fair Trade, shade-grown, and organic coffee. In light of periodic collapses in coffee prices, we will explore the impacts of market volatility on producers, processors, distributors and consumers, and evaluate various policy approaches that have attempted to mitigate the “infamous coffee cycle.” Why do consumers in the United States see little change in coffee prices when international prices experience drastic declines? We will also consider ongoing controversies over coffee consumption and health. The course will be run as a graduate seminar, and undergraduates are expected to engage fully in this opportunity to experience a graduate level course. To do well in this course, students need to come to class prepared to discuss the readings assigned for that day, and participate in class activities and discussions.

Required Texts:

Notes:
• All readings that are not in the required texts are posted on Canvas in alphabetical order by first author and title.
• Reading assignments are listed for the day that they will be discussed. Come prepared to discuss the readings in class.
• **Optional readings are REQUIRED for graduate students**
• Additional readings may be added as the course develops.

Questions to Explore:
• Why is coffee such a popular beverage? What roles does coffee play in our daily lives, and why?
• How do we think about and perceive coffee? What theoretical approaches help us to examine the social uses, values and meanings associated with coffee and other foods?
• How have controversies over the social, political and medical dimensions of coffee related to societal and historical processes?
• What roles did (and do) coffee production and trade play in the development and evolution of modern nation-states and the global economy?
• How does coffee production impact producers’ livelihoods and the natural environment? What does this indicate more generally about the impacts of commodity crops on people and the environment?
• How may consumers influence coffee’s economic, social and environmental dimensions?
• What are the potential health benefits and risks of coffee consumption?
• What opportunities exist for environmental, social and economic sustainability in the production and consumption of export goods such as coffee?
• How is fair trade different from conventional markets? What are its goals, advantages, and shortcomings?

Course Objectives and Outcomes:
• Explore the diverse meanings and values associated with coffee consumption and its representations through time, with respect to relevant theoretical approaches.
• Analyze how coffee has been used in various ways to symbolize, reinforce and occasionally challenge cultural values, social norms, and political realities.
• Understand the relationships between the history of coffee and the development of the global economic system.
• Gain understanding of health risks and benefits of coffee consumption, and critically assess competing and changing scientific, medical and sociocultural perspectives on food and health.
• Learn about the social, political, economic and ecological realities of coffee production and consumption from perspectives of different stakeholders.
• Explore challenges of sustainable production, marketing and consumption in the Global South, with particular attention to coffee.
• Learn about the differences between conventional and alternative markets, their advantages, shortcomings and objectives.

• Practice participant observation and consider patterns of consumption

Assessments and Grading:
Detailed instructions for each assignment will be discussed in class and posted on Canvas.

Evaluative Components (200 pts possible):
• Participation: In-class written commentaries, discussion questions, class activities including field trip (25 pts)
• Midterm Project: Participant observation in coffee shops, field notes, and report (50 pts)
• In-class team debate and position statement: (25 pts)
• Presentation and activity leadership on one of the class themes (team or individual) with annotated powerpoint or prezi slides (25 pts)
• Visit Volta Coffee for coffee tasting on one Saturday morning in February. Write a 1 page summary of your experience (10 pts)
• Abstract and detailed outline of the research project (paper or presentation)(25 pts)
• Final Paper (9-12 pages for undergraduates, 15-20 pages for graduate students)
Topics must be approved in advance by Dr. Tucker (50 pts)

Grading Policy:
The course will be graded by standard percentages; the grade will not be curved.

A = 93- 100%  A- = 90- 92.99%  B+ = 87-89.99%
B = 83-86.99%  B- = 80-82.99%  C+ = 77-79.99%
C = 73-76.99%  C- = 70-72.99%  D+ = 67-69.99%
D= 63-66.99%  D- = 60-62.99%  F = below 60%

Late Submissions: Late submissions of assignments will be discounted 10% per day. This is simply fair to those in the class who meet deadlines, otherwise they would be disadvantaged relative to those who took more time.

University Honesty Policy

Plagiarism and cheating in any form are subject to university policy as outlined by the Dean of Students (http://www.dso.ufl.edu/sccr/honorcodes/conductcode.php).
