## The Urban Divide in Latin America

**Challenges and Strategies  
for Social Inclusion**

For more information:  
<http://conferences.dce.ufl.edu/LAS/>

Latin America has the largest percentage of urban population of any world region in addition to the most unequal distribution of income. This inequality is most apparent in cities, where the richest and the poorest live in close proximity, and social inequality becomes evident in spatial terms. How can urbanists affect policies that foster social inclusion? This multidisciplinary conference aims to gather scholars and professionals dedicated to improving the quality of life in urban Latin America. This forum will provide participants an opportunity to share their research and experiences, and to engage in dialogue to generate ideas and identify solutions to advance social inclusion in Latin American cities.
